+1 939-361-0857 | nordielm@gmail.com | Vega Alta, Puerto Rico 00692 | github.com/nordiel | linkedin.com/nordielmartinez | nordiel.com

OBJECTIVE

Senior Computer Science student (B.S.) with over two years of hands-on experience in full-stack software engineering, research, and applied AI solutions.

EDUCATION

Inter-American University of Puerto Rico – Bayamón Campus
Bachelor of Science, Computer Science

Aug 2022 - Dec 2026 (expected)

- Supplemental Coursework: Modeling & Simulation, Cybersecurity.

Inter-American University of Puerto Rico – Bayamón Campus
Certificate Program, Pharmacy Technician

Aug 2020 - May 2022

- GPA: 3.46

SKILLS

Languages & Frameworks: Python, C#, JavaScript/TypeScript, Angular, HTML + CSS, Bootstrap

Databases & Tools: SQL, Elasticsearch (ELK Stack), Docker, WiX Toolset, GitLab, YouTrack

Additional: Fluent in English and Spanish (Bilingual)

EXPERIENCE

Aptima Puerto Rico, Remote
Software Engineer Intern

Aug 2023 - Present

- Developed an Angular/TypeScript web interface used by AFRL researchers to host and visualize 3D training models, improving accessibility and collaboration for simulation-based research and pilot training.
- Engineered a secure Windows installer using WiX Toolset for software transfer into air-gapped Air Force environments, implementing license-validated bundles that reduced deployment friction across restricted systems.
- Authored metadata and protocol compliance guidelines referencing NIST and DoD standards to improve data tagging and safeguarding practices for pilot training environments.
- Contributed to a pilot tracking dashboard in Angular integrated with Kibana/Elasticsearch, enabling correlation of flight and munitions logs with specific pilots, increasing data utility for training analysis.
- Optimized internal python library bulk-loading process by adding parallel execution, achieving a 1.96x performance improvement in data processing throughput.

Master Workforce, Remote
Assistant Researcher

May 2023 - Aug 2023

- Developed an interactive phishing identification and decision-support **system** using Python, OpenAI's ChatGPT API, and Gradio, providing automated email content analysis with contextual phishing probability and rationale.
